

## POST-DOC en CDI

LUDO-VIC is a Paris-based Company aiming at revolutionizing the e-Learning sector through the use of animated talking chatbots which reflect emotions, in several languages. The animated characters are based on the existing avatars Ludo & Vic, as seen herebelow :

Our company's motto is "Whatever your mother tongue and your level of schooling, learn the basics of any concept: a new language, security procedures, proper behavior, etc..."

These avatars play out various scenarii in 3D animation which contextualize elements of the concept to be taught, and the chatbots will use adaptive learning techniques to interact orally with the learner in an ever-increasingly sophisticated manner, using both verbal and non-verbal signals.

The post-doc salary is around 2600€/month gross, and the position can be held in a part-time home-based work configuration. We have an "agrégé d'anglais" working from his home in Lyon... The position is open as of now, till it's filled in !

Applications should be forwarded to our President/Founder, Jack Amberg ( [jack@ludo-vic.com](mailto:jack@ludo-vic.com) )
